Abstract In this paper, four species of the genus *Exechiopsis* Tuomikoski from China are described as new to science. The type specimens are deposited in Zhejiang Forestry College.

Key words Diptera, Mycetophilidae, Exechiini, *Exechiopsis*, new species.

The genus *Exechiopsis* Tuomikoski is mainly a Holarctic genus with nearly 60 described Palearctic species, which is recorded for the first time from China. The present paper adds 4 new species. The type specimens are deposited in Zhejiang Forestry College.
